

Change of phase Unit 3: Learning goals/objectives: Identify the three states of matter and the phase changes that occur during: Evaporation, Condensation, Boiling, Freezing, Melting. Explain how energy is related to phase change. Describe the factors that affect the rates of evaporation and condensation. Explain the relationship between condensation, evaporation, humidity and weather patterns.

Day 1

- Bill Nye States Of Matter videos 1-3 and notes
- Antifreeze article reading/writing activity

Day 2

- Finish Lab: Relative Humidity Lab
- Study for Unit 3 Test on Thurs/Friday

Day 3

- All Assignments due
- Unit 3 Test
